That is my concern. This is the data on the EPA website that was released to the public. I do not someone to misinterpret the results, although a careful look should reveal that it was just a simple spreadsheet error.

Gold King Mine Data, August 13, 2015

Validated sampling data for the Animas and San Juan Rivers from the Northern Border of New Mexico to Navajo Nation collected from Aug. 9 to Aug. 10, 2015.

You are spot on. Thanks- where did you get this data?

Subject: Look at the zinc

Shahid,

There is a blank in the total zinc for row Q, more proof that when some transferred the data, they just left off the aluminum.
